Queen of the North (Triumph)

We have always noted a demand for the lovely bicolor Tulip. In Queen of the North we present one of the most impressive and delicate of all bicolors. An exquisite variety for cutting.

Our guarantee label which appears throughout this folder, means exactly what it says. During the past five years it has required great effort and ingenuity on our part to be able to supply as comprehensive a list of bulbs as we have. While the flowering results of these bulbs were excellent, nevertheless it was not always possible for us to obtain bulbs of as fine appearance and size as we would have liked.

We know now that we can supply top size quality in full size bulbs, and that is why we are anxious to make this guarantee. There is no question about our bulbs this year. They will be better than ever.

This is our first bulb offer for the season of 1946. We are able to make this extremely low offer for all of these varieties, which are the cream of the crop, because it is possible for us to have our bulbs especially packed in Holland, saving us a considerable cost.

There will be two subsequent bulb offers by us; one in July, and the other our general Fall bulb catalog which will be ready in late August or early September. The latter will present a complete list of all bulbs for indoor and outdoor planting as well as perennial plants.

Fantasy Tulip

Almost everyone appreciates the beauty of Parrot Tulips for garden and cut flower purposes. We are glad indeed that we can present a list of six additional colors, and a mixture of this popular class of Tulips. See Parrot Tulip List for description of varieties and colors.
